

# INTERSTATE BUS LINES 14 MILLION PASSENGERS 250 BUSES

## Automatic Fare Collection powered by VixView for Bloemfontein operator

### KEY FACTS

- Department of Transport compliant reporting
- Customised management reports for improved operational efficiency
- First system of its type in South Africa

By partnering with Vix-Questek, Interstate Bus Lines (IBL) has upgraded to the TP 5800 ticketing and fare collection system. This allows IBL to harness the power of the VixView business intelligence reporting functionality enabling them to drive their business with innovative decision making. Data is communicated between the front office, depot and back office and is accessible from any internet connected smart device.

This business discovery platform delivers true self-service business intelligence and transforms the way IBL manages their operation. Vix-Questek has used IBL's existing legacy smartcard infrastructure and implemented a seamless migration to Vix formatted cards.

Operating out of Bloemfontein, IBL is a diversified transport enterprise which has been providing integrated mobility and transport related services to travellers in the Free State since 1975. Their routes cover the greater Manguang local municipality areas as well as daily services between Thaba 'Nchu, Botshabelo and Bloemfontein, as well Brandfort and Verkeerdevlei.
